PLEASE VIEW THE CHART BELOW FOR PIPE FREEZING JACKET CLEARANCES

| PIPE SIZE | Required Pipe O.D. Clearances From Any obstruction - such as: Other Pipes, Walls, Air Ducts, etc. | Required Linear Clearance on straight Pipe. This location MUST be Straight Pipe with no Welds, Fittings, Solder Joints, etc. |
|-----------|--|---|
| 1" | 3" | 5" |
| 2" | 3" | 6" |
| 3" | 3" | 9" |
| 4" | 3" | 9" |
| 5" | 5" | 14" |
| 6" | 5" | 16" |
| 8" | 5" | 20" |
| 10" | 5" | 25" |
| 12" | 5" | 27" |
| 14" | 5" | 30" |
| 16" | 6" | 35" |
| 18" | 6" | 40" |
| 20" | 6" | 42" |

(3" radial clearance on line sizes 4" and smaller, length of jacket 2D + 1" - no welds of fittings) (5" radial clearance on line sizes 5" and larger, length of jacket 2D + 3" - no welds of fittings)

| What type of system are you working on: | |
|--|--|
| | (i.e. chilled water, hot water, condenser, etc.) |
| What will the line temperature be, at the time of the freeze: (if the system is above 110 degrees F - we will need to discuss the application fund | her) |
| Does the system contain any glycol: | No No |
| If Yes - What % Ethylene Prop | ylene |
| Is the application | |
| What is the system pressure: | |
| Verify the flow through the freeze area can be stopped during | the freeze: |
| If flow cannot be stopped - Why: | |
| Verify the distance the freeze is from any flowing branch lines (During the freeze process - if less than 15D, please call to discuss) | s: |
| How large is the room we are working in, or above: | |
| Distance bottles can be placed from freeze location: (If this involves moving the bottles up or down stairs, seek alternate method of | placement) |
| What is the ambient temperature in the room: | |
| Is there air flow in the room: | |
| Is the location a pit: | If yes - How deep: |
| Where can the liquid nitrogen bottles be unloaded: (You must verify that there are no obstructions, or stairs, between the unload p | oint and the bottle placement for the freeze) |

| During what timeframe is this project exp Weekday Weeknight | | Holiday | | |
|--|---|----------------------|----------------------------|--|
| What kind of work will be done, once the | freeze plug is established: | | | |
| | (i.e. cut and install valve, chan | ge existing valve, s | ystem modifications, etc.) | |
| For planning purposes, how long is your v | ork expected to take to comple | te: | | |
| (This is for liquid nitrogen and planning purposes) | | | | |
| Will you be introducing heat to the pipe , | such as: welding, soldering, bra | zing or cutting | the with torch, etc. | |
| If yes - Is the welding or soldering | Above Below | Horizontal | from the freeze | |
| How far away from the freeze are you wel | ding, soldering or brazing: | | | |
| (DI II : C : t I t II -I t I t C t t | | t one foot away) | | |
| (Please call if you intend to weld closer that one foot t | o the freeze plugWe preferr to be at leas | | | |
| riease call If you intend to weld closer that one joot t | the freeze plugWe preferr to be at leas | | | |
